

REGULAR NEWSLETTER OF THE DUAL ACADEMY

(JANUARY - FEBRUARY 2024)

Duálna
Akadémia

SUMMARY

Dear friends of the Dual Academy,

We are pleased to bring you the first newsletter of 2024, focusing on the events and successes we experienced in the months of January and February.

Every year, the beginning of the year is mainly associated with the recruitment of ninth graders who will start their educational journey with us in just a few months. We are proud to announce two outstanding students of the month who have shown us their passion and dedication to education.

We have been preparing promo videos for the recruitment of new students and we are proud to launch our new Bilingual Technical Lyceum. This initiative has opened the door for a wider range of educational offerings and provided new opportunities for our students.

In addition, we have begun to communicate more intensively our values, which form the basis of the Dual Academy and accompany us every step of the way. We were delighted to welcome a successful last Doors Open Day of this school year.

We believe these events have helped us move forward and reinforced our mission to develop your potential for success in the world of technology.

Thank you for your support and commitment to the Dual Academy.

Dear friends and supporters of the Dual Academy,

THANK YOU FOR YOUR SUPPORT IN 2023

Last year, thanks to your generous contributions, we were able to implement several activities that we have been planning for a long time. We were able to successfully set up an audio-visual studio where we are now able to create interesting marketing outputs together with our students.

We have also started a outdoor fitness playground project, which is scheduled to be built during the spring of this year. The individual elements were selected based on a vote by our students.

For all of this, we owe you a big thank you.

FOUNDING OF THE NEW CIVIL SOCIETY ORGANISATION (CSO) DUÁLKA o.z.

The new **Civil Society Organisation Duálka o.z.** will replace the non-investment fund ROZVOJ n.f.

Due to legislation, we are currently in a transition period where ROZVOJ n.f. is no longer able to receive contributions from the 2% tax donation and the CSO Duálka o.z. will only be able to receive them in 2025 for the 2024 tax returns.

The reasons for the change were mainly to consolidate and thus simplify processes, to create a single platform for DA and SSOŠA DA as well as to align the name with the Dual Academy brand.

WHAT IS THE OBJECTIVE OF THE CIVIL SOCIETY ORGANISATION DUÁLKA o.z.?

- To organize and support school and educational activities.
- To participate in educational, training, and operational activities.
- Providing better facilities for education.
- Improving the material and financial conditions of the educational process and extracurricular activities at the school.

Primary sources of funding for o.z. Duálka will be voluntary contributions or donations from parents and other supporters of the school, donations and grants, and contributions from the 2% tax donation (starting in 2025).

WHERE TO 2% OF TAXES THIS YEAR?

This year we would like to ask you to send your 2% of your taxes, for the reasons listed below, to a trusted partner, the Volkswagen Slovakia Foundation, with whom we have worked successfully for many years and who have financially supported projects in education in the past, for which the Dual Academy has applied.

THE DECLARATION OF DONATION OF UP TO 2% (OR 3%) OF THE 2023 TAX PAID CAN BE FOUND HERE:

<https://www.nadacia-volkswagen.sk/dvepercenta/>

**Nadácia
Volkswagen Slovakia**

DECLARATION

WHERE CAN FUNDS BE TRANSFERRED TO IN THE FUTURE?

As mentioned, you will also be able to contribute your 2% to the new civil society organisation from 2025 onwards and support the students of the Dual Academy as you have done in the past when you contributed to the development of education at the Dual Academy.

We look forward to helping you develop your children's future!

Thanks.

MATÚŠ TANČIBOK

Dual Academy graduate talks about school, internship, and apprenticeship

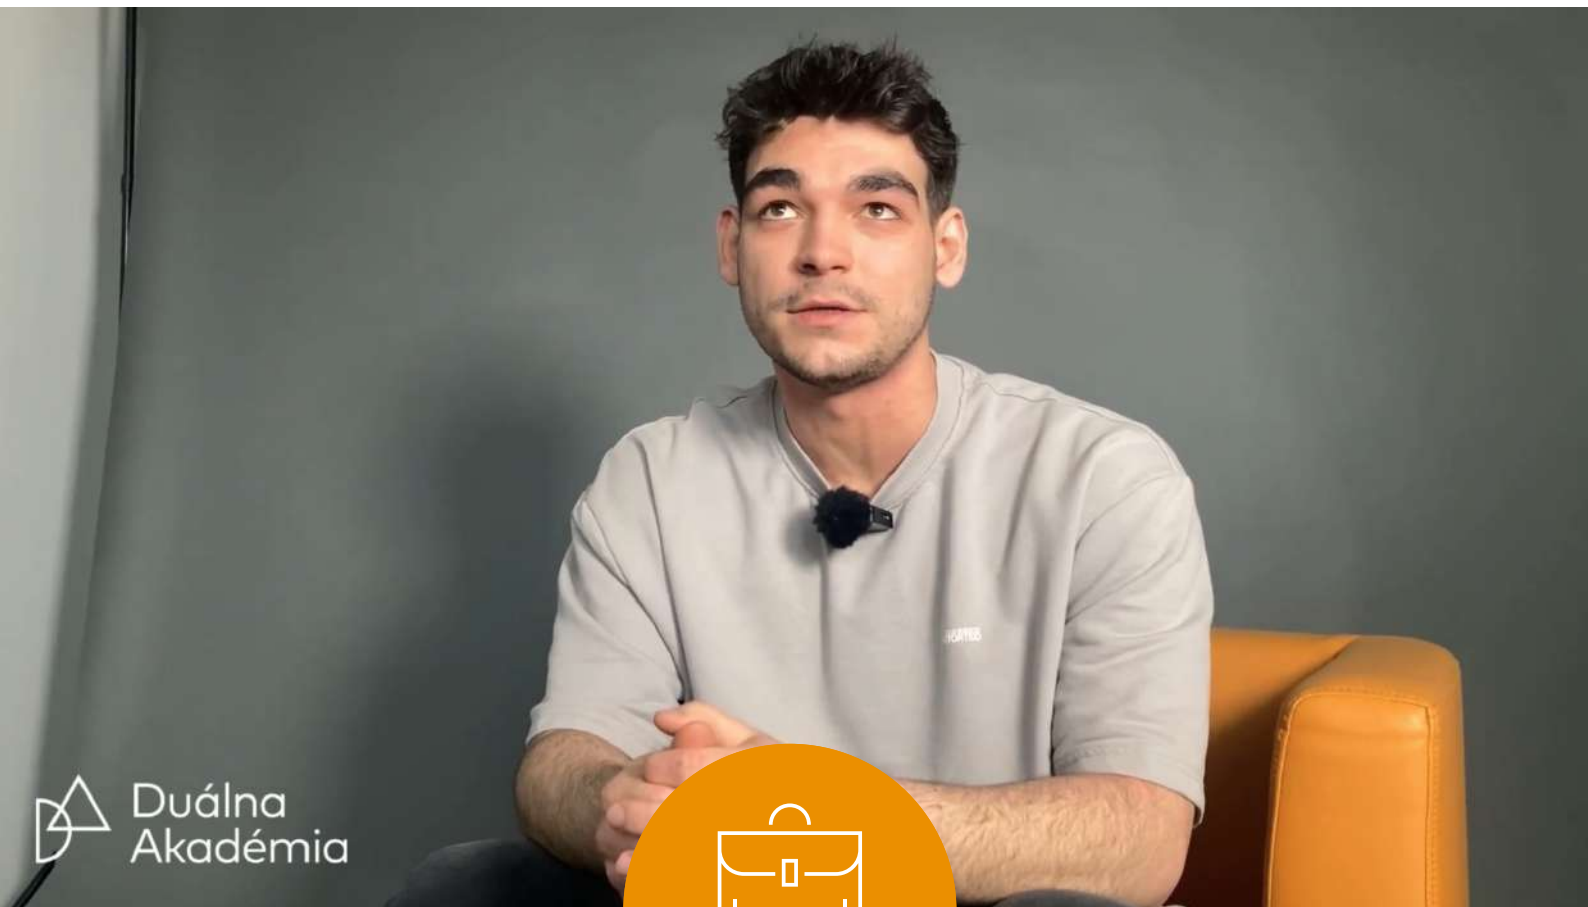

At Dual Academy, we care about our students.

That's why we make sure that they get the best and highest quality education that they can use after school and get into the workforce without any problems.

Our graduate **Matúš Tančibok** is also a great help, as he passes on his experience at Volkswagen Slovakia to our student **Oliver Miko**.

Matúš decided to help him because he went through the induction process himself with other trainers and knows how much it can help. He says Oliver is a very quick learner and smart. They also get along because they both know the Dual Academy well and are both enthusiastic about working to improve themselves.

SKILLS COMPETITION

We have already informed you that our third graders **Dominik Hanic** and **Marek Steiner** won 3rd place in the 2023 team skills competition.

However, watch the videos in which our clever students will tell you how this competition at the KNM Secondary Vocational School of Mechanical Engineering in Kysucké Nové Mesto took place and what they take away from it.

And since only two other teams were able to beat the students of Duálka, we congratulate them once again for the beautiful placement and representation of our school.

WATCH VIDEO

The first #Hydepark of this calendar year was marked by student of the month, but also by helping and courage!

The student of the month for December was our clever II.ME OI student **Marek Hampachel**, to whom we warmly congratulate. We believe that this award will encourage him to do even better and he will be rightly proud of his knowledge and skills.

During the Hydepark, our school psychologist Mrs. Zuzana Hrdinová took the floor and spoke about the need for openness, communication and help for those who have no problem asking for it. As she said, students often close their eyes to negative things and pretend not to see them. However, if they muster the courage to talk openly about them, students always have an open door at her place.

FIRST GLOBAL 2024

Dualka Team is gearing up for the FIRST Global 2024 Robotics Olympics! The Robotics Olympiad is an annual event for high school students from over 180 countries around the world and aims to bring young people together to solve global problems through robotics and innovation.

At Dualka Team, we are motivated, smart and full of enthusiasm for robotics and its possibilities. Our goal is to win the Slovak round and represent Slovakia at the international robotics competition FIRST Global 2024, to show the world that even a small country can be a big player in the field of technology.

See how their mentor and our master Ing. Igor Mozolák, who is also responsible for the coordination and management of the team or communication with the organizers, put the team together. Fingers crossed!

PROMO VIDEOS

Something is always happening in Duálka! Take a look at what it was this time.

At Dual Academy, we've been working on promo videos for our high school to show you what it's like to be in a high school that's alive with technology. We hope that by showcasing our dynamic, technology-filled dual-enrolment program, we will attract more smart students to our school.

Thanks to HomeMedia production, we had a 2-day shoot where our students, masters, teachers, or parents became actors, and we must admit that they did very well.

OPEN
COMMUNICATION

January's #Hydepark brought interesting news, but also compliments!

We talked about the role of the energy man, the person who switches off the lights and keeps an eye on them, but also about the two new reinforcements who check the litter and cleanliness of our school premises.

Also, our students **Marek Chvátal** and **Tomáš Hermann** from I.MM earned praise and became heroes for us, as they took care of the order and dryness in the changing rooms without prompting. We are happy and proud that you care about your neighbourhood, thank you guys! #responsibility

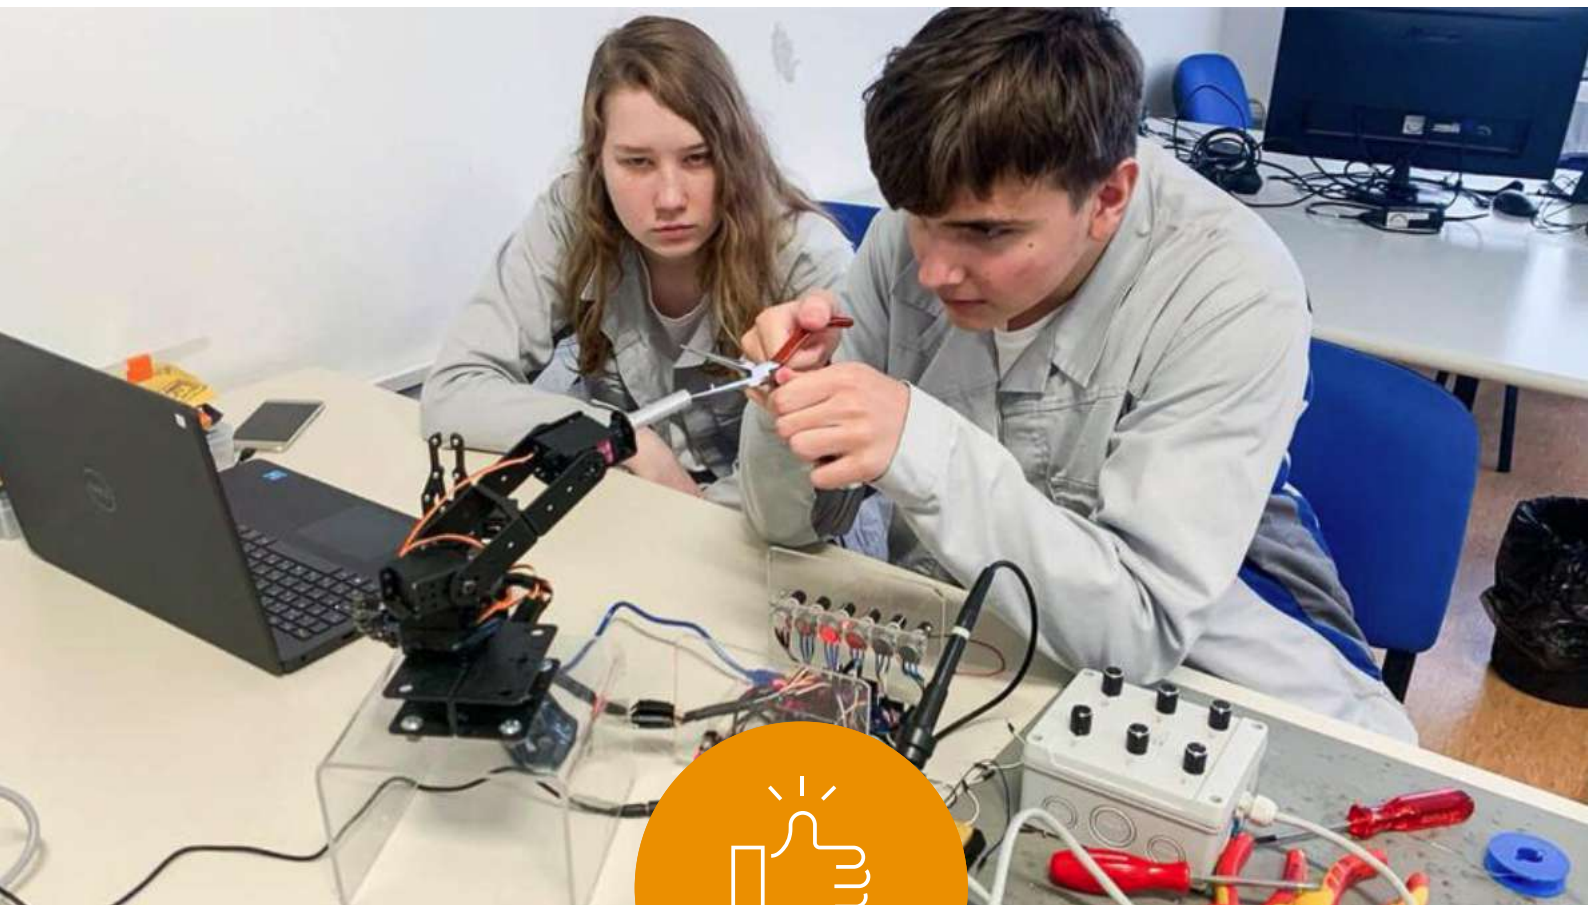

What is Arduino? Do you know? Our MEoi sophomores know!

Arduino is a platform that uses a graphical development environment to create interactive projects. (Good to know!)

As part of our training, our MEoi sophomores got into the fascinating world of Arduino, having fun creating simple schematics and experimenting with creating programs. Some focused on bringing to life an older robot that was also programmed using the Arduino platform.

What do our pupils directly think about this training? Read more in our article on the web.

COOPERATION WITH ŠKODA ACADEMY

"This is what good cooperation beyond the contract looks like," remarked our colleague Milan Ráchela during a meeting of partners from Škoda Academy, Czech Republic - ŠKODA AUTO a.s. Střední odborné učiliště strojírenské.

This visit was an important milestone in the project Educating auto- electronics and electrical engineers for the challenges of the future.

The Dual Academy presented the achievements of the project since its start in April 2022. We have implemented the objectives and increased the quality of vocational education.

"We are proud to announce that the visit was successful and provided valuable insights," said project coordinator Nora Belousova. We look forward to the continuation of the project and to a successful cooperation.

SKIING COURSE

Students of the Dual Academy have been exploring the Slovak slopes!

Our freshmen enjoyed the winter and snowy hills on a ski course in RZ Paradise in Rajecké Teplice. They strengthened not only their muscles and fitness, but also interpersonal relationships and strengthened the team.

We believe that thanks to the nice weather, no injuries, they were able to go back to school with enthusiasm.

FEBRUARY
2024

BILINGUAL TECHNICAL LYCEUM

In Duálka we have started working on the opening of a new field of study, which will be a bilingual technical lyceum.

The Bilingual Technical Lyceum is a combination of technical education and the ability to communicate in two languages, which will result in language-savvy professionals who will be proficient in the latest trends and technologies.

On behalf of the Bratislava Self-governing Region, Mayor Juraj Droba also commented on the current situation in the education system, stating that the current situation requires more than just an increase of places in high schools (secondary schools).

The technical lyceum - bilingual studies can be a golden mean between the choice of academic and professional career.

This is the number of participants at the last Doors Open Day of this school year at the Dual Academy.

Thank you for the record number of visitors, which proves that studying technology is worthwhile. A big thank you also goes to our organisers, employers and management, who presented the premises of our school and the benefits of dual education to those interested.

- You met our employers Volkswagen Slovakia, Škoda, ZSE, Daikin Europe, Slovnaft and Motor-Car Group.
- You talked to Kai-Stefan Linnenkohl, member of the Board of Management for Human Resources at Volkswagen Slovakia.
- You visited the school premises and discovered the advantages of studying at Duálka.
- You learned about the bilingual technical lyceum.
- The girls received a gift of Som ExpertKA socks.

WORKSHOPS GREENPOWER SLOVAKIA

Workshops within the Greenpower Slovakia project continue!

Our first and second year AU students **Samuel Hupka, Kevin Vajas, Tomáš Lovas, Jakub Svrček, Viliam Meszaroš and Daniel Dvoran** took part in workshops at the FEEI STU BA. They were focused on Datalogger construction, batteries - measuring their capacity and care for them or motor, its properties and regulation.

The workshops will show the students the way to the possibility of innovation and improvement of the electronic formula. They will culminate in a race GreenPower electric formulae of category F24 at the kart track in Dlha near Trnava, which will take place on 22.6.2024.

Thank you for giving our students the opportunity to expand their knowledge and skills outside the Dual Academy and gain new knowledge that they will use in the future.

FEBRUARY
2024

THE ARRIVAL OF VOLVO TO SLOVAKIA

On 7 February, the management of the Dual Academy participated in a meeting with investors in the village of Kechnec, where a meeting was held at the invitation of the mayor of the village Ing. Jozef Konkoly.

The aim of the meeting was to help the investors from the Kechnec Industrial Park with the qualification of current and new workers. The mayor and the companies see us as a potential partner who can help them with the challenges of the future.

The arrival of the Volvo car company is a huge opportunity, but also a risk in terms of skilled workforce.

Investors are placing emphasis on the development of the dual education system and the great need for retraining of employees.

OLIVER MIKO – STUDENT AT THE DUAL ACADEMY

"Whether it's a guy, a girl, a man, a woman, it plays absolutely no role," says **Oliver Miko**, a 4th year student in the field of auto technician.

At the Dual Academy, we give everyone an opportunity. Technology has long since ceased to be the preserve of men, and we believe that smart girls and young women have the same right to learn and gain experience that they will use during their studies at our secondary school.

THE PRODUCT CREATION PROCESS

Do you know how a product is created? Our students do - they found out in a lecture called The Product Creation Process.

Andrej Karel, who has been working at Volkswagen Slovakia since 1995, where he is involved in the preparation of new car models, lectured our students about the exciting research into the world of production and product creation.

"I was very pleasantly surprised by the pleasant atmosphere and friendly people. I was very pleased with the variety of questions, which I really didn't expect. I believe I will repeat my visit to the Dual Academy and thus pass on the experience I have gained," said Andrej Karel.

At the Dual Academy, we are launching a series of expert lectures designed not only for our students.

LENKA EXNEROVÁ - STUDENT'S MOTHER

"There was such a good atmosphere in Dualka! It was beautiful there. I was absolutely amazed," says Lenka Exnerová, mother of a 1st year student.

We are committed to making our students feel comfortable during their studies. We give them an environment that meets the highest requirements for learning or practice. Modern facilities and experienced masters guarantee quality education on a daily basis, which ensures that the students can find a job on the labour market during their studies.

HYDEPARK

February's #Hydepark revealed motivating awards, new ideas, but also minor shortcomings.

During Hydepark, we announced the January Student of the Month at the Dual Academy, which was **Martin Tesák**, a 3rd year student. We sincerely congratulate him and hope that this award will motivate him to even better results.

We are happy that our 3D printing is successfully developing and bringing new challenges every day.

We enthusiastically welcomed the presentation of our freshman **Tomáš Valček**, who presented his idea for a school bus. He gave us a detailed and creative explanation of the benefits that a school bus could bring to the students.

In his presentation, Tomáš explained not only the reasons for buying a school bus, but also the actual operating costs, the prices of individual trips, or options for specific types of buses.

We are very supportive of this proactivity and proud of him!

FEBRUARY
2024

OLÍVIA ZACHAROVÁ - STUDENT AT THE DUAL ACADEMY

"I know how to disassemble an alternator. I know how an alternator works," says **Olívia Zacharová**, a car enthusiast and the face of the Som ExpertKA initiative. Everyone has the opportunity to study in Duálka.

You just have to want, have enthusiasm, desire to learn and improve. At the same time, we also focus on self-development and many projects such as I am an ExpertKA, which aims to attract more girls and young women to the world of technology.

YOUNG CAR MECHANIC SLOVAKIA 2024

We're going to win it this year!

Just like last year, this year we are actively involved in the international competition Young Car Mechanic Slovakia 2024 under the auspices of Inter-cars. They have tightened the rules compared to last year, so it will be even more challenging for us. 40 vocational secondary schools from all over Slovakia entered the competition and a total of 902 students took part.

We are thrilled to report that only 80 students advanced to the regional round of the competition, among which we have SIX talented students from the Dual Academy. Last year we narrowly missed out on 1st place when our student Daniel Kádek came a close 2nd.

We are hoping that this year we will succeed and get the coveted 1st place.

Dualka.Sk

During the first two months of 2024, we were able to finalise a complete hardware replacement for all employees of the Dual Academy and the Dual Academy Private Vocational Automotive Secondary School (SSOŠA).

As well as the migration to the common Microsoft 365 cloud environment under the common domain dualnaakademia.sk.

Thus, as of March 1, 2024, all DA and SSOSA employees have an active email address in the form of meno.priezvisko@dualnaakademia.sk.

Email addresses with the sosaba.sk extension are being redirected to these new mailboxes and we are preparing to close them. We are also preparing the activation of accounts for all students. We believe that this step will make communication between parents, pupils, pedagogical staff and non-teaching staff and the management of DA and SSOSA more efficient, smoother, and standardised.

We are currently working on consolidating internet connectivity throughout the building, as well as mapping key processes suitable for digitalisation and automation. In February, we launched an initiative to enhance the digital competence of DA and SSOSA with an emphasis on the use of AI and its application in collaboration with the Kempelen Institute for Intelligent Technologies, the Slovak Academy of Sciences and Open Play, where we are preparing a series of lectures, and workshops on this very interesting topic. We will inform you soon about specific activities.

THE FIRST YEARBOOK OF THE DUAL ACADEMY

We have successfully completed the all-dual academy photo shoot of students, staff and students. We are happy to move into the second phase together and preserve our memories thanks to the first yearbook of the Dual Academy.

The first yearbook can be yours too!

Eighty pages of colourful memories. Individual and group photos of students, classes, events, trips and activities of the Dual Academy and its students. Humorous comments by students and much more. Take advantage of this unique opportunity to order a yearbook and preserve your memories of one of the best times of your life.

"I AM DELIGHTED THAT OUR PROJECT WILL FIND A PRACTICAL APPLICATION"

Close connection between secondary education and practical training of Volkswagen pupils studying at the Private Vocational Secondary School for Automotive Dual Academy, better knowledge of the environment, knowledge transfer and project work that is helpful directly in production practice. All of this came together at the flash station.

The practical training that our dual apprentices undergo at various plants in Volkswagen Slovakia brings positive benefits not only for the education of the apprentices, but also for the plants themselves. An example of such a connection is the flash station project in the pilot hall.

As part of their professional practice, the future graduates of the autotronics field of study, **Marián Haško** and **Tibor Kálozi**, are working on it. Their classmate **Alex Michalčík**, who is currently on rotation in the Quality Assurance Department, also had a hand in the beginning of the project.

"Flashing is writing a program to the control unit. The software of the storage unit can become outdated by deploying a new technical change, so it needs to be updated using flash. This is done by a station that provides the process of flashing and testing the control units outside the vehicle," explains **Vladimír Sedláček** from the pilot hall, under whose guidance the pupils are working on the aforementioned project.

The station was made by students using components commonly used in vehicle manufacturing Volkswagen Slovakia and other commercially available parts. The front panel and the individual covers were cut from aluminium sheet using waterjet technology. The internal electronics were constructed according to the design of the software station and the electrical schematics of the vehicles used in the pilot hall and electrical finishing. Connectors, also made by the students, are used to connect the concrete control unit and the flash station. The communication between the control unit and the station is done using buses such as CAN, FlaxRay and Eternet.

"The students have an excellent opportunity to deepen their practical skills and theoretical knowledge in the field of car electronics and electrical engineering," adds **Vladimír Sedláček**.

TEXT: NATÁLIA SEGURA, TATIANA MINČÍKOVÁ • PHOTO ADAM TKÁČIK

„Chlapci sú šikovní a vidieť, že sa chcú učiť. A my im svoje znalosti radi odovzdávame. Na začiatku sa museli do projektu dostať, postupom času sa v ňom však udomácnili. Sme s nimi spokojní a majú našu dôveru. Flashovacia stanica, výsledok ich úsilia, je pre nás skutočne nápomocný,“ hodnotia žiakov **Vladimír Sedláček** (na fotografii v strede) a **Jozef Saller**, vedúci oddelenia električky a elektroniky v pilotnej hale.

INTERVIEWING EMPLOYERS

Starting in January 2023, the regular bimonthly Dual Academy Newsletter began publication. In 2024, we are launching a new section **"Employer Interview."**

where all our employers will gradually have the opportunity to report on their organization and what it offers to our students. The questions will always be the same for each employer representative.

INTERVIEW WITH THE EMPLOYER - DAIKIN SLOVAKIA

Answered by: **Ing. Vladimír Orovnícky**
Managing Director at Daikin Slovakia

He has been with Daikin since 2002.
Cooperation of Daikin Slovakia
and the Dual Academy started in 2022.

Why should a student choose your company as his/her employer in dual education? Give three reasons.

If someone is looking for a dynamic job with modern renewable technologies, we are the right choice. We are a stable company whose products are world-leading in innovation and are characterized by high reliability in the country. We are evidently positioned as market leaders. The greatest added value of our company is our people and their knowledge and expertise, so we strive to attract young people whose energy will be an additional added value and at the same time working for our company will be motivating in all aspects.

What are the most significant new developments that have recently taken place or are planned in your company?

We are currently preparing a laboratory in one of the parts of the Dual Academy, where we will demonstrate how the heat pump, this partly Slovak invention, works. It will show what all kinds of technical challenges this modern technology can cope with, and at the same time, the individual exercises will show beautifully how important people are for this technology.

- INTERVIEW WITH THE EMPLOYER - DAIKIN SLOVAKIA

Answered by: **Ing. Vladimír Orovnícky**
Managing Director at Daikin Slovakia

He has been with Daikin since 2002.
Cooperation of Daikin Slovakia
and the Dual Academy started in 2022.

If they had to describe your company in one word, what word would it be?

Innovative.

How do you select your future students in the Dual Academy? What should a student be skilled in, what do you look for when selecting candidates?

We are a relatively new partner and we are mainly looking for adventurous students who prefer dynamic work, bringing new challenges every day, and at the same time are not afraid to co-create the learning program with us.

What are the students' prospects with you or does your company have a plan for working with graduates?

Alternatively, please give successful examples from your practice. We have a merit scholarship, a training stipend, reimbursement of part of travel expenses, a meal allowance and, of course, a reward for productive work. And one huge benefit in the form of a very attractive future profession.

In newsletter in March - April 2024 we look forward to interviewing our
